

Name: _____

Date: _____

Science

Across

- 2. Anything that occupies space and has mass
- 5. a particle with a negative electric charge that orbits the nucleus of an atom
- 7. A substance dissolved in a solution
- 9. In an atom, the core of protons and neutrons: in a Eukaryota cell, the organelle that contains most of the DNA and directs most of the cell's activities
- 10. in a solution, the substance in which the solute is dissolved

Down

- 1. a chemical attachment between atoms
- 3. attachment between atoms in a compound
- 4. a subatomic particle with a positive charge
- 6. An atom or molecule with an electrical charge
- 8. A subatomic particle with no electric charge
