

Name: \_\_\_\_\_

# Science

## Across

- 2. Happens when loose rock falls down a steep slope
- 5. Decomposed organic matter
- 6. Large mass of moving ice
- 8. Deposits left behind when glaciers retreat
- 9. Mixture of weathered sediment, organic material, water and air

- 10. Rapid movement of a large mass of mud

## Down

- 1. Sudden movement of a large amount of material downslope
- 3. Mounds of wind deposited sand
- 4. Extremely slow movement of material downslope
- 7. Very fine sediments carried by wind over long distances
