

Name: _____

Date: _____

Science module 7

Across

- 3. imaginary line runs through Greenwich England
- 5. imaginary lines that run east and west across the earth
- 10. warm air mass
- 14. air currents near the north pole
- 15. two air masses traveling in the same direction collide
- 16. what does cold air do
- 18. two air masses collide

- 19. rotation of the earth bends the path of winds, sea currents, and objects that fly through different latitudes

Down

- 1. warm air masses moves into a region of colder air
- 2. very cold air mass
- 4. two air masses collide and neither moves
- 6. cold air mass moves into a region of warmer air
- 7. imaginary lines that run north and south across the earth

- 8. air mass formed over the ocean
- 9. air mass formed over the continent
- 11. cold air mass
- 12. what does hot air do
- 13. imaginary line that runs between the north and south hemispheres
- 17. large body of air with relatively uniform pressure, temperature, and humidity
