

Science of Biology

Across

- 2. Process that uses chemical energy to produce carbohydrates
- 6. Process that uses energy from the sun to convert CO₂ and H₂O into carbohydrates & oxygen
- 13. Wear when working with chemicals.
- 15. Water's molecules have a _____ allowing it to dissolve into ionic compounds
- 17. Plants like grass and trees
- 18. Should always be present in lab.

- 19. The four macromolecules include carbohydrates, _____, amino acids, & nucleic acids
- 20. Statement that either accepts or rejects hypothesis.

Down

- 1. When to tell the teacher if an accident occurs.
- 3. Measures length
- 4. _____ eat fecal matter of decomposers
- 5. Measures volume.
- 7. Animals like the buffalo and lions

- 8. A community of biotic organisms living with the abiotic components of their environment
- 9. The curve of the surface of a liquid.
- 10. Developed to be answered by experiment.
- 11. A series of organisms that transfer energy from one to the other
- 12. Place specimen on the _____.
- 14. Prediction of questions possible outcome.
- 16. Measures mass
