

Science vocab

Across

- 1.** A change in physical form, like solid to liquid to gas
- 4.** Orbits the nucleus of an atom, negative charge
- 8.** Atoms arranged in a geometric pattern
- 11.** The bonding of two or more atoms
- 13.** Makes up everything

- 14.** Temperature when's solid starts to melt
- 16.** Temperature when a liquid starts to boil

Down

- 2.** Part of the nucleus of an atom, no charge
- 3.** A change to a new substance
- 5.** Joining of two or more elements

- 6.** The result of combining two different atoms
- 7.** One of the atoms bonded to another atom in a chemical reaction
- 9.** Smallest particle
- 10.** Made of all the same type of atoms
- 12.** Joining of atoms
- 15.** Part of the nucleus of an atom, positive charge
