

# Scientists

1. Studies outer space
  2. Designs and builds body parts and devices
  3. Studies all forms of life
  4. Studies animal life
  5. Studies animals and the way they do things
  6. Studies birds
  7. Studies blood and its diseases
  8. Studies butterflies/moths
  9. Studies classification
  10. Studies earthquakes
  11. Studies elements, atoms, and molecules
  12. Studies fish
  13. Studies insects
  14. Studies mammals
  15. Studies microscopic organisms
  16. Studies minerals
  17. Studies motion, forces, and energy
  18. Studies parasites
  19. Studies fungi
  20. Studies plant life
  21. Studies processes that change and shape the earth
  22. Studies reptiles and amphibians
  23. Studies rocks, minerals, and earth's land forms
  24. Studies sound and its properties
  25. Studies the atmosphere and weather
- A. Dermatologist
  - B. Meteorologist
  - C. Taxonomist
  - D. Geophysicist
  - E. Chemist
  - F. Astronomer
  - G. Microbiologist
  - H. Botanist
  - I. Physicist
  - J. Geologist
  - K. Mineralogist
  - L. Biomedical Engineer
  - M. Herpetologist
  - N. Lepidopterist
  - O. Parasitologist
  - P. Biologist
  - Q. Zoologist
  - R. Entomologist
  - S. Mycomogist
  - T. Ichtgyologist
  - U. Ecologist
  - V. Mammalogist
  - W. Seismologist
  - X. Cudiologist
  - Y. Ornithologist

26. Studies the environment

Z. Environmentalist
