# Sea Floor Features

## Across

- 3. a deep underwater valley cut into continental margin
- 5. circular reefs
- 7. landforms characterized by steep mountain sides and flat floors
- 9. also known as sea floor spreading
- 10. flat topped sea mounts
- 14. cone shaped mountain peaks that rise above the ocean floor

- 15. large flat area on the ocean floor, made of sediments

- 16. also called oceanic trench
- 18. continental shelf, continental slope, continental rise
- 19. reefs very close to shorelines
- 20. reefs that sit far from the shoreline, for barriers

## Down

- 1. a chain of volcanic island

- 2. a type of SONAR used to determine water depth
- 4. area of deep cracks
- 6. geysers on the sea floor
- 8. flat or gently sloping submerged part of a continent
- 11. gently rolling slope between a continental slope and an abyssal plain
- 12. steep boundary between continental shelf and rise
- 13. long area in middle of ocean that is seismically active
- 17. uses sound to navigate
