

Searching for Security

Across

- 4. The systematic study of political behavior institutionalized at the turn of the twentieth century.
- 5. The policy of the United States during the Cold War that checked aggressive Soviet actions with military alliances.
- 6. A view of the global order that sees the state and the rules that govern it as an artificial construct.
- 9. The right of state to self-determination--to attend to their own affairs without being subjected to the unwanted interference of others.

- 10. A system of states that relies on shifting alliances to balance relationships and prevent conflict.
- 11. Political philosophy from the democratic tradition that emphasizes the potential for cooperation among states.
- 13. A philosophy that emphasizes cooperation to establish a peaceful world order.
- 14. A political philosophy that sees the struggle for power and the potential for conflict as a necessary evil in the pursuit of national interest.

Down

- 1. A political organization in which loyalty and political obligations take precedence over political boundaries.

- 2. An organization of political units that are relatively cohesive but with no higher government above them.
- 3. A policy designed in the late 1960s to promote opportunities for US-Soviet cooperation.
- 7. A commitment to and support of the nation's interest.
- 8. A political organization in which one government is dominant over most of the world with which it has contact.
- 12. A type of interstate system where two states hold the most significant power.
