

Seed to Sunflower

Across

1. A sugary liquid that flowers make to attract insects.
3. When a seed has finished growing and is ready to fall from the plant.
9. Small animal with six legs.
11. When a grain of pollen joins with the egg in a carpel.

12. The story of how a living thing changes from birth to death.

Down

2. When a seed begins to grow
4. The part of a plant that grows into the soil. It soaks up water and holds the plant in the soil.
5. Part of the plant. Leaves and flowers grow from it.

6. A young plant when it begins to grow from a seed.
7. Yellow dust that is made by the male parts of a flower.
8. The male part of the flower. Each contains pollen.
10. The female part of a flower. Each contains an egg.
