Sewing Equipment

Across

6. Used to measure short lengths, such as hem and seam widths. Is 6 inches long and has plastic sliding marker.

7. Used to get the wrinkles out of fabric.

8. Used to hold two layers of fabric together.

10. A long metal rod with a hook that is used to bias tubing right side out.

11. A flexible tape that is 60 inches long, used for body measurements

13. Used with tracing paper to transfer lines on fabric. Most common one has a saw-tooth blade.

Down

1. Tool used to help protect fingers when sewing by hand.

2. Small squares used for marking fabric.

3. A firm, round cushion used to press curved areas of a garment.

4. Used for removing stitches and has a small blade on the end.

5. Used for cutting fabric and has a bent handle,. One handle is larger than the other.

9. Shears that have a zig zag design to help prevent raveling.

12. Something you should ALWAYS be aware of when sewing
