Simple Probability

<u>Across</u>

- **3.** Probability based on analysis of all possible outcomes
- **4.** Probability based on experimental trials
- **5.** Events that have different attributes
- 6. A possible result of an experiment
- **8.** Multiple events in a probability experiment
- 9. Likelihood of something occurring

10. Situations where the occurrence or non-occurrence of one ever has no influence on the probability of the other event occurring

Down

- 1. Different events that can happen at the same time
- **2.** The occurrence or non-occurrence where one event influences the probability of the other event occurring
- **7.** Set of outcomes that have a common characteristic
