## Across

2. The body's resting rate of energy expenditure.
5. The tendency for distributed study or practice for long term retention.
7. "Morphine within" - natural opiate like neurotransmitters linked to pain control and to pleasure.
9. A person's characteristic emotional reactivity and intensity.
10. A nerve network that travels through brainstem; and plays important role in controlling arousal.

## Down

1. The hopelessness and passive resignation an animal or human learns when unable to avoid repeated aversive events.
3. In piaget's theory, the inability of the preoperational child to take another's point of view.
4. The extent to which a test samples the behaviour that is of interest.
6. The period of sexual maturation, during which a person becomes capable of reproducing.
8. Concept of mental frameworks that organize and interpret information.
