

# Social Psychology

## Across

- 8.** The comparison of oneself to others in ways that raise one's self-esteem
- 9.** Any group of people with a particular religious or philosophical set of beliefs and identity
- 10.** The pattern of behavior that is expected of a person who is in a particular social position
- 12.** Theory stating that prejudice and discrimination will be increased between groups that are in conflict over a limited resource
- 13.** Changing one's behavior as a result of other people directing or asking for the change
- 14.** Prosocial behavior that is done with no expectation of reward and may involve the risk of harm to oneself

**15.** The study of the relationship between biological systems and social processes and behavior

## Down

- 1.** The scientific study of how a person's thoughts, feelings, and behavior influence and are influenced by social groups
- 2.** Referring to the effect that the presence of other people has on the decision to help or not help, with help becoming less likely as the number of bystanders increases
- 3.** The tendency to overestimate the influence of internal factors in determining behavior while underestimating situational factors

- 4.** Cause of behavior attributed to external factors, such as delays, the action of others, or some other aspect of the situation
- 5.** Socially desirable behavior that benefits others
- 6.** Sense of discomfort or distress that occurs when a person's behavior does not correspond to that person's attitudes
- 7.** Educational technique in which each individual is given only part of the information needed to solve a problem, causing the separate individuals to be forced to work together to find the solution
- 11.** social groups with whom a person does not identify; "them"
