# Soggy Biscuit 3

## Across

2. how much cells are created in mitosis  
 6. 3rd stage of mitosis  
 8. what makes the spindle fibers in mitosis  
 9. what do the nitrogenous bases attach to on the backbone of dna and rna  
 10. what holds the sister chromatids together  
 13. mrna always starts with what codon  
 14. once translation is completed where does the mrna enter  
 16. first stage of mitosis

20. final product of translation  
 21. Francis Crick and James Watson created the first model of what  
 22. when did Alexander Fleming die  
 24. what does mrna stand for  
 25. how much percent does are dna act as genes  
 26. when was Alexander Fleiming born  
 27. what is the shape of a dna strand  
 28. what is a hypothesis  
 29. 4th stage of mitosis  
Down  
 1. 2nd stage of mitosis  
 3. last stage of mitosis

4. what does trna stand for  
 5. what does dna stand for  
 7. what codon ends the mrna strand  
 11. the backbone of dna is composed of sugars and  
 12. where do we get our dna frome  
 15. 5th stage of mitosis  
 17. in dna the nitrogenous base A pairs up with  
 18. what does dna code for  
 19. what do the spindle fibers attach to in mitosis  
 23. what is a segment of dna that codes for a protein
