

Solar Power

Across

3. A flat plane who's purpose is to absorb sun rays and convert them to electricity

4. Cell that produces electrical energy from solar energy

6. Power which is produced by chemical or physical resources

8. Enviromentally friendly, won't die out

11. Exposure to the suns rays

12. A unit of electrical energy

Down

1. A phenomenon which can produce light, heat, and power

2. A branch of physics which studies the conversion of different energy forms

5. The emission of energy as electromagnetic waves

7. Solar power is a type of _____ energy

9. The source of solar power

10. the smallest component of an element
