

Solutions

Across

3. Mixture of metal and one or more other elements.

7. A substance that is dissolved to make a solution.

9. The amount of solute dissolved in a solvent at a particular temp

11. A substance that dissolves to make a solute.

12. A substance that can donate a hydrogen ion from another substance.

13. A scale that concentration is measured on

Down

1. The amount of solute dissolved in a solvent at a particular temp.

2. A solution that has a low concentration of solute.

4. Particles are larger then those found in a solution.

5. The amount of that substance that will dissolve in a certain amount of solvent at a given temp.

6. Type of mixture, called a homogeneous mixture that is the same throughout.

8. Substance that can accept a hydrogen ion from another base.

10. A substance is neither an acid or a base.
