

Solutions Vocabulary

Across

3. solutions with water as a solvent
 7. a small amount of solute dissolved in a solution
 8. a solution that has not reached the limit of solute that will dissolve in it
 9. a large amount of solute dissolved in a solution
 12. a mixture where the parts are all mixed uniformly

13. a solution whose concentration is accurately known

Down

1. process of adding more solvent to a solution
 2. describes the amount of solute in moles and the volume of the solution in liters
 4. when a solution contains as much solute as will dissolve at that temperature

5. expresses the mass of solute present in a given mass of solution

6. a solution that contains more dissolved solid than a saturated solution will hold at that temperature
 10. the substance present in the largest amount
 11. the other substance(s) in the solution
