

Solving Absolute Value Equations

Across

- 2. Signified by the minus symbol
- 3. Less than or greater than symbols
- 6. Used to count, measure, and label
- 10. Not a valid solution to the problem
- 11. Indicated by the equal sign
- 13. Size of the object
- 14. A quantity that may change within the context of a mathematical problem
- 17. Gives you a product

- 18. Signified by the plus symbol
 - 19. Total distance around the edge of a figure
 - 20. The x-coordinate of a point where a line, curve, or surface intersects the x-axis
- Down**
- 1. Contains ordinary numbers, variables (like x or y) and operators
 - 4. How many times a number is contained within a number
 - 5. The magnitude of a real number without regard to its sign

- 7. A number that it to the right on a number line (past the number 0)
- 8. A number that is to the left on a number line (past 0)
- 9. Variable that satisfies an equation
- 12. A measure of the 2 dimensional space that it covers
- 15. Numbers that are negative, positive, large, small, etc
- 16. Each term is either a constant or the product of a constant
