

Name: _____

Date: _____

Space Tools + Technology

Across

3. Telescopes that turn sound waves into images
8. Space probes contain certain technology depending on the space _____
9. Space tools and technology are used to collect what _____
10. Spectroscopes can compare the spectrum of a star to known _____
11. The scientists who study the data from space technology

Down

1. Telescopes and other instruments launched into outer space to collect data
2. This technology orbits around Earth with special instruments and telescopes
4. A telescope that uses lenses and mirrors to collect and focus visible light
5. Reflector telescopes collect light through this kind of mirror
6. Telescopes that use convex lenses
7. An example of a space observatory
