

Stars and Constellations and Planets

Across

- 2. I am the most recognizable shape in the night sky from the northern hemisphere. However, I am not a constellation, but rather I am part of a larger constellation known as Ursa Major.
- 7. I have two nicknames, Little Bear or Ursa Minor
- 9. My red coloring give me away, i am a neighbor to earth.
- 11. Star Light, Star Bright, First star I see tonight....But am I really a star?

- 12. My nickname is "The Bull"

- 14. you call me home

Down

- 1. I am the zodiac sign for people born in June. I am also known as the Twins.
- 3. I can be your guiding light.
- 4. This constellation carries the nickname of "The Hunter"
- 5. Most people giggle when they hear my name

- 6. I am the largest planet in the solar system, and I have an enormous storm on my surface known as the great red spot,
- 8. Dwarf Planet, once considered the 9th planet in our solar system.
- 10. I am the closest planet to the sun, yet I am not the hottest planet.
- 13. I am most easily identified by my rings
