

# Static Electricity

## Across

4. An example of an insulator  
 5. Allows electricity to flow through it  
 8. If an object has MORE positive charges than negative charges, it will be....  
 9. Opposite charges...  
 11. Has a positive charge  
 12. Charges stay in place

13. Does not allow electricity to flow through it  
 14. Has a negative charge  
 15. Charging by rubbing  
 16. An example of a conductor  
**Down**  
 1. A chart that compares substances tendencies to gain or lose electrons

2. Discharging an object by touching the earth  
 3. Charging without touching  
 6. Charging by touching  
 7. If an object has gained electrons, it will be...  
 10. Like charges....
