

Statistics

Across

2. Absolute zero
 8. Has an absolute zero
 9. Has an arbitrary zero
 10. Nominal or ordinal
 11. Open ended questions and responses
 12. Ranks
 14. Any characteristic that varies
 16. Should be able to reproduce the study and get the same results

17. Used for discrete data
 18. Discrete categories, such as gender, eye color, etc
 19. Number of times something occurs during an interval
 20. Internal and ratio

Down

1. Neither researcher nor subjects know what group they are assigned to
 3. Bar graphs with continuous data

4. Height, weight, # of siblings
 5. Collect numerical data such as frequencies, percentages, means, quartiles, etc.
 6. Observe a phenomenon and take measurements
 7. Arbitrary zero
 13. Names
 15. Only researcher knows who goes into what group
