

Story of science

Across

2. Is learning new things
 9. Is a chemical compound that conducts electricity by changing into ions when melted or dissolved into a solution
 10. The central point, pin, or shaft on which a mechanism turns or oscillates
 11. A machine for converting mechanical energy into electrical energy; a generator
 13. A person who lives a solitary life

14. A force under the influence of which objects tend to move away from each other
 15. A unit of electric current equal to a flow of one coulomb per second
 16. Move or go with a smooth up and down motion

Down

1. Salt water
 3. Every object moves in a straight line unless acted upon by a force
 4. Emitting light as a result or being heated

5. A seemingly absurd or self contradictory
 6. A conducting wire or thread with a high melting point
 7. Very remarkable
 8. Was the first electrical battery that could continuously provide an electric current to a circuit
 12. Is a conclusion based on indirect facts or observations
