

Name: _____ Date: _____ Period: _____

System Of Equations

Across

3. Then, _____ the variable in the second equation with its equivalent from the first equation.
4. A system of equations can have _____ solution.
7. A system of equations can have _____ solution(hint 2 letter).
9. The solution of a system of equations that intersect at one point is a what?
10. You can also use algebraic methods to solve a system of equations. One method is called _____.

Down

1. s a collection of two or more equations with the same set of variables.
2. A system of equations can have can also have _____ Solutions
5. The solution of a system of equations is where the graphs of the equations do what? .
6. To solve systems of equations by substitution, solve _____ for a variable.
8. One way to solve a system of equations is to _____ the equations on the same coordinate plane.
