

# TEST ONLY - NOT THROUGH APPROVAL - VELTASSA

## Across

3. Angiotensin II is a hormone which causes what? (16)
8. Which drugs has Veltassa shown a reduced bioavailability with when administered concomitantly? Ciprofloxacin, levothyroxine and which other? (9)
10. What anatomical structure of the kidney is at the interface between the blood and filtrate? (10)
11. What is Veltassa's active pharmaceutical ingredient? (9)
13. Which Veltassa clinical trial was a phase II-dose finding study? (8,2)
14. The renin-\*\*\*\*-aldosterone-system is a hormonal system that regulates blood pressure and fluid balance (11)

15. Which clinical study showed that Veltassa allowed more patients to get their spironolactone dose increased and was well-tolerated? (5,2)
16. In the kidney there are about 1,000,000 of these, which produce urine in the process of removing waste and excess substances from the blood? (7)

## Down

1. This is a mineralocorticoid hormone that stimulates potassium renal excretion? (11)
2. Potassium is a positive ion, also known as a..? (6)
4. Which term refers to a vascular access commonly used in patients on dialysis? (7)

5. Potassium in the serum is commonly measured via...? (12)
6. Which blood parameter is used for the estimation of the glomerular filtration rate? (10)
7. Which clinical study compared the efficacy of Veltassa at reducing serum potassium when taken with food versus when taken without food? (10)
9. In Bushinsky et al., what were the most common adverse events seen? Constipation and ....? (11)
12. Which clinical trial showed a mean change in serum potassium of -1.01 mmol/L from baseline to week 4 when patients received Veltassa? (4,2)
