Date: _____

Taxonomy

Across

3. Which Phylum has rough, spine covered skin and body divided into 5 segments?
 4. Which Phylum has no exoskeleton, soft, unsegmented bodies, and mouth and anus
 10. Arthropods with more than 5 or more pairs of legs are known as?
 13. Arthropods with legs on every segment except head and last segment and flattened bodies are called?
 14. What Phylum commonly have shells, may have tentacles, no legs, soft body not divided into segments?
 16. What is the Genus of humans?
 17. What is the Family of humans?
 18. Which Phylum has soft spongy body with no organs, and water passes through pores?
 19. What is the Species of humans?
 20. Echidnas and platypus are examples of what?

23. Which Phylum has hollow soft belly, no body organs and often have tentacles with stinging cells?

25. Mammals with a pouch are called?

27. What is the sub class of humans?

Down

1. Arthropods, Echinoderm, Molluscs, Porifera, Platyhelminthes, Annelids, Nematodes are examples of what?
 2. What is the Order of Humans?
 5. Arthropods with 3 pairs of legs and head, thorax and abdomen and exoskeleton are known as?
 6. Which Phylum has soft flat, unsegmented bodies, no exoskeleton and mouth but no anus?
 7. Which Phylum has soft body with obvious head, mouth and anus and no exoskeleton?
 8. Phylum of animals with jointed legs, exoskeletons and body divided into segments

9. What is the kingdom of humans?

11. Arthropods with two pairs of legs on each segment except head and last segment and round bodies are called

12. What is the phylum of humans

15. Arthropods with 4 pairs of legs are known as?

21. Plants, Animals, Fungi, Monera and Protista are examples of what

22. Mammals, birds, fish, reptiles and amphibians are examples of what?

24. What is the class of humans?

26. Chordata, Arthropods, Echinoderm, Molluscs, Porifera, Platyhelminthes, Annelids, Nematodes are examples of what?
