# Teaching Strategies

## Across

8. Students see how to complete each step  
 11. Brings outside expertise into the classroom  
 12. Teacher presents information orally  
 13. Simulations that involve students acting out stories  
 14. Students acting out a role without a script.  
 15. Teachers must meet the different learning styles of their students

16. Begins with a question or problem based on a learning objective.

## Down

1. Gives learners the opportunity to share what they have learned  
 2. Small group learning in which students work together to achieve a common goal  
 3. Assignments involve a task or problem students must solve using their complementary and interdependent skills  
 4. Basic ways of learning through a textbook

5. Students think deeply about an issue or something they have learned.

6. Opportunity to work with materials, ideas, people, or processes.  
 7. Puts students in situations that feel real even though they are not  
 9. Groups of students working together to analyze a situation or case  
 10. Used to reinforce learning, build skills, and provoke thought
