

Tectonics Plates Puzzle

Across

2. what causes the tectonic plates to move

5. oceanic crust is _____ than continental crust

7. great science teacher

13. name of super continent

14. when two continental plates pull apart

15. plates slide past each other

16. plates move apart

18. the himalayan mountains were formed because of a

19. plates move towards one another

20. stay in the same place

Down

1. process that adds new crust

3. continents are slowly moving over earths surface

4. states slowly driven by movement in the mantle

6. continental crust is _____ than oceanic crust

8. 2 continental plates pull apart

9. ring of volcanoes and earth quakes

10. pieces of earths crust move on top of the

11. discovered plate tectonics

12. plates slide under another

17. hot part of mantle rises through the crust
