Textiles

Across

5. The first fabric created, comfortable to wear, shrinks easily, and usually needs to be dry-cleaned.
6. This type is often combined with cotton to make a blend.
8. The term for fabric when it is found and harvested out in nature...
9. A strong, lightweight fabric that does not absorb moisture well and can be uncomfortable in hot weather.
10. The general term for fabric that absorbs water...

Down

1. The term for fabric when it is made from chemicals in a chemical plant...
2. A strong fiber similar to rayon, but can be machine washed and dried.
3. The most widely used natural fiber, soft, absorbs moisture, easy to wash and wrinkles and shrinks.
4. The general term for fabric that repels water instead of absorbing it...
7. Very light, strong, flexible, and comes from the cocoons of worms.
