

The Atmosphere

Across

- 4.** Variable gas that is fundamental to the water cycle
- 5.** Most common gas in the atmosphere
- 6.** The layer of atmosphere where the temperature varies between -60°C and 0°C
- 7.** Gas necessary for respiration
- 9.** The gas that makes up 21% of the atmosphere

- 10.** The lowest layer of the atmosphere

Down

- 1.** Variable gas, taken in in the process of photosynthesis
- 2.** Example of a solid in the atmosphere _____ crystals
- 3.** The layer of the atmosphere that lies between 50km and 80km
- 8.** The 'layer' within the stratosphere responsible for filtering out harmful ultraviolet radiation
