

# The Atmosphere

## **Across**

- 2.** measures air quality  
**4.** like a warm blanket  
**10.** ozone and exhaust react with sunlight  
**13.** 21% of Earth's atmosphere  
**14.** mixing indoor and outdoor air  
**16.** forms from car exhaust  
**17.** protects us from harmful rays

- 18.** the uppermost layer

- 19.** radioactive gas

- 20.** air molecules push on a surface

## **Down**

- 1.** acid falling as rain

- 3.** the measure of pollution in air

- 5.** contaminated of air

- 6.** gas that surrounds Earth

- 7.** break down of oxygen

- 8.** layer between the stratosphere and the thermosphere

- 9.** tiny solids in the air  
**11.** lowest layer of the atmosphere

- 12.** 78% of Earth's atmosphere

- 15.** layer between the troposphere and the mesosphere
