

The Cell Parts

Across

- 4. The study of living organisms.
- 6. Jelly like substance in cell that is mostly made up of salt and water.
- 8. The basic unit of living organisms.
- 11. The organelle that controls the cell.
- 12. Sorts and packages proteins.
- 14. Makes proteins.

- 15. A thin layer that lets things in and out of the cell.
- 16. Removes waste.
- 17. What a cell is made of.
- 18. Makes sunlight into food in a plant cell.

Down

- 1. Transports proteins to the Golgi Apparatus
- 2. Provides energy to the cell.
- 3. Is a prokaryotic cell.

- 5. A rough layer outside of a plant cell.
- 7. Don't have a nucleus or other membrane bound organelles.
- 9. Move liquid in and out of the cell.
- 10. Has a nucleus and other membrane bound organelles.
- 13. Sensory organelle but also deals with locomotion.
