

The Digestive System

Across

- 4. You can live without it, but it can kill you if it bursts
- 7. Poop
- 8. Rhymes w/Larynx, in your throat
- 10. Due to COVID-19, currently covered by masks
- 11. Can get a cavity
- 14. Stores bile, beneath the liver

- 15. The largest internal organ; all the blood leaving the stomach and intestines pass through this

Down

- 1. Does most of the digesting of the foods you eat; is the largest part of the digestive system, 20 ft. long
- 2. Absorbs water and salts from the material that has not been digested as food
- 3. Between the large intestine and anus

- 5. Food passes through this from the pharynx to your stomach
- 6. Makes enzymes that break down sugars, fats and starches; also makes hormones
- 9. Your food goes here when swallowed
- 12. Home to 5 types of taste buds
- 13. Fluid produced by the liver and breaks down fats
