

The Digestive System

Across

1. Stores bile
8. Projections into the small intestine to increase surface area
9. Enzyme used to break down lipids
11. Results when not enough water is absorbed back into the body
13. Secreted by goblet cells to protect the stomach mucosa from acid
15. Slurry created by mixing digestive juices and food
17. What is the muscle layer labelled A on the small intestine figure?

19. Carries food from mouth to stomach

20. Secretes digestive enzymes
21. Enzyme used to break down proteins

Down

2. Absorbs nutrient molecules into the blood
3. The part of the small intestine closest to the stomach
4. What is number 3 on the figure?
5. Folds in the walls of the stomach

6. What is the muscle layer labelled B on the small intestine figure?

7. Carries out the detoxification of poisons and metabolic wastes
10. Part of the digestive tract that removes water from waste
12. Where feces is stored and collected for excretion
14. Muscular, J-shaped enlargement of the intestinal tract
16. Digestive secretion produced by the liver
18. Enzyme used to break down starch
