

Name: _____

Date: _____

The Endocannabinoid System

Across

5. a neurotransmitter that plays a part in regulating cognitions such as motivation and reward-seeking behavior
 6. flavonoids unique to cannabis that contributes to its overall smell, taste, and appearance
 10. most abundant terpene found in cannabis
 12. the most well known cannabinoid (it's a long one!)
 13. terpene found in pine needles
 14. the most prevalent form of pinene in cannabis

15. terpene used for centuries for its stress-reducing and relaxing effects
 17. compounds found in the resinous glands of the cannabis plant
 18. the maintenance of a stable internal environment despite fluctuations from the external environment
 19. cannabinoids produced within the human body

Down

1. second most well known cannabinoid that doesn't produce psychoactive effects
 2. the act of applying heat (hint: turns THCA into THC)

3. only terpene known to also act as a cannabinoid

4. cannabinoids produced within the cannabis plant

7. the product breakdown of THC

8. natural chemicals produced by the cannabis plant

9. responsible for producing aromas associated with different strains

11. terpene found in household cleaning products

16. the proposed mechanism (effect) by which cannabinoids and terpenes act synergistically to modulate the overall effects of cannabis
