

The Greenhouse Effect

Across

- 4. This greenhouse gas is also an air pollutant and comes from synthetic fertilizer and cars
- 6. This greenhouse gas is produced from cows and agricultural practices
- 9. This greenhouse gas used to be put in aerosol products but was banned because it eats the ozone layer
- 11. Small country composed of multiple islands that is disappearing due to climate change

Down

- 1. These are responsible for heat being trapped in our atmosphere and warming the earth
- 2. The amount of CO2 and other carbon compounds emitted due to consumption of fossil fuels.
- 3. The trapping of radiation within the earth's atmosphere
- 5. The layer of the atmosphere we inhabit
- 7. This greenhouse gas is produced from driving and deforestation
- 8. Planet similar to earth with no greenhouse effect
- 10. This greenhouse gas occurs naturally and is not considered a pollutant
