

The Life Processes (Functions)

Across

- 2. Elimination of waste products resulting from metabolism
- 3. Can't produce
- 5. Consumers
- 8. Controls metabolism (hormone)
- 12. Eats meat
- 13. fermentation
- 15. Take in
- 17. Elimination of undigested food

- 19. One parent (no variation)

- 20. Alcohol + Carbon Dioxide + Energy
- 22. Circulation + Absorption
- 23. Producers (make their own food)
- 24. Sum of all chemical reactions in an organism

Down

- 1. Breakdown of nutrients
- 4. To stop; keep from happening

- 6. Involves oxygen

- 7. Eats both plants and meat
- 9. Movement
- 10. Eats plants
- 11. growth
- 14. Without oxygen
- 16. Control
- 18. Process that makes energy
- 21. Involves sex cells from different parents
