

The Male Reproductive System

Across

6. Male hormones
7. Where sperm are stored while they develop
8. A tube that conveys both urine and sperm through the penis
9. Male gonads that produce sperm and male hormones
10. Secretes a thick clear fluid that lubricates and nourishes the sperm
11. A duct that loops around the bladder and joins a duct coming off of the seminal vesicle

Down

1. Coiled tubes in the testes that make sperm
2. External sac that contains the testes
3. Produces a protective fluid that forms part of the semen that neutralizes the acidic environment of the urethra
4. Where sperm and urine exist in the male reproductive system
5. Gland below the bladder that secretes a fluid that balances the acidity of any traces of urine
