

Name: _____

Date: _____

The Nervous System #2

Across

3. sense of vision
 6. a period of paralysis of the central nervous system
 7. located behind the frontal lobe
 11. correspond to the major bones of the cranium
 15. A automatic response
 17. links the cerebrum with the cerebellum
 18. Abused Drug
 20. most important part of the nervous system
 21. The outer layer of the cerebrum
 23. ion gates the open and close quickly
 28. complex brain structures
 31. rapid eyes movements

32. physical organ helps with thought, memory, thinking, and intelligence
 33. acts like a switch-board, roating activation signals from the reticular formation
 34. located between the cerebrum and the spinal cord
 35. damage to the cerebral motor area
Down
 1. forward portion
 2. simplest nerve pathway
 4. coordinate the movements of both eyes
 5. lowest part of the brain stem
 8. Mass of nerve fibers
 9. network of neurons
 10. affects the patients control of posture and movement
 12. a control unit

13. action potential reaches synapse a chemical
 14. a form of partial or complete hearing loss
 16. disturbance of the brain caused by physical illness
 19. serve spasms of jaw muscles
 22. as response to particular stimuli
 24. located on either side of the brain
 25. degeneration and inflammation of nerves
 26. right and left of the brain
 27. second largest part of the brain
 29. serious injury of the nervous system
 30. a loss of memory
