

Name: _____ Date: _____

The Processing Cycle

1. the process of recording speech, sound effects, and music
 2. basic input/ output system
 3. compact disk, recordable
 4. a matrix of rows and columns of dots.
 5. write once, read many
 6. a term that refers to the amount of data
 7. a vertically aligned group of hard disk mounted inside a computer
 8. a mouse that allows a user to with hand or waist injurers to use a computer
 9. the procedure of preparing a disk for use
 10. a permeant vision of output
 11. a small scanner used for scanning small or curved areas.
 12. a printer that prints much like a typewriter
 13. removable hard disk manufactured by lomega company that offer 1GB storage
 14. a nonimpact printer
 15. a coprocessor that processes numerical data
 16. the screen or display on which computer output appears
 17. a smooth fabric surface that facilitates use of a mouse
 18. a type of expansion board developed specifically for small PC's
 19. the main part of a personal computer system
 20. a type of input the enables a user to see and void obstacles in their way.
 21. A type of code printed on products and packages
 22. a port for connecting a monitor to the system unit
 23. a numbered concentric circle on a magnetic disk along which data is stored.
- A. audio input
 - B. laser printer
 - C. bitmap
 - D. disk pack
 - E. video port
 - F. nonimpact printer
 - G. math coprocessor
 - H. a mouse pad
 - I. zip drive
 - J. WORM
 - K. PC card
 - L. CD-R
 - M. system unit
 - N. impact printer
 - O. Jaz
 - P. handheld scanner
 - Q. hard copy
 - R. monitor
 - S. vision input system
 - T. USB
 - U. UPC
 - V. track
 - W. bus bandwidth
