

Name: _____ Date: _____ Period: _____

The Rock Cycle

Across

5. Example of sedimentary rock

7. Example of an igneous rock

8. The process of which one rock changes after another; igneous, metamorphic and sedimentary

11. Process that compresses sediment by the weight of the rock layers above them

12. When a rock cools slowly and forms crystals

13. Molten material outside of volcano

14. Rock made by heat and pressure

15. where igneous rocks form at

Down

1. Lives inside a volcano

2. Example of metamorphic rock

3. rocks are form by compaction and cementation

4. the process of breaking down smaller rocks

6. Sediments are lay down in layers

9. Process that makes sediments stick together

10. The process of moving sediments from one place to another
