

Name: _____

Date: _____

The Universe

Across

5. rocky body travels through space
8. path object takes around another object
11. objects attract through gravitational force
12. release or send out
13. outermost layer of the sun
14. Study of objects beyond Earth
15. sun-centered

17. space and total sum of matter and energy

18. brightness of star from Earth

19. Galaxy in which Earth's solar system is located

Down

1. rock orbits sun
2. pinwheel-shaped galaxy
3. chunks of rock that strike the Earth's surface

4. measurement of solar system

6. energy from sun absorbed by ozone

7. spherical body orbits star

9. earth-centered

10. from the word "plankton" which means "to wander"

16. capacity work; usable power

20. point in orbit farthest from the sun
