

# The Water Cycle

## Across

10. when water runs off the surface  
 11. when water becomes gas and goes upwards  
 12. when an object comes between the rain and the ground  
 13. water stored on the surface

## Down

1. the storage of water underground in rocks  
 2. permeation of a liquid into something  
 3. the portion of flow which is sustained between precipitation events  
 4. the storage of water in soil

5. the volume of water which flows through a river in a given time  
 6. when water is lost via leaves  
 7. the flow of water through a medium  
 8. the act of water falling out of a cloud  
 9. the movement of water through soil or permeable rock
