

Name: _____ Date: _____ Period: _____

The Water Cycle (Ch.15)

Across

1. The change of state from a gas to liquid

7. An area along a river that forms from sediments deposited when the river overflows it's banks

8. A fan-shaped mass of rock material deposited at the mouth of a stream

10. One of the bends, twists, or curves in a low-gradient stream or river

12. The volume of water that flows within a given time

13. A stream that flows into a lake or into a larger stream

14. Continuous movement of water between the atmosphere, the land, and the ocean

15. A process of removing salt from ocean water

Down

2. Total loss of water from an area, which equals the sum of the water lost by evaporation from the soil by transpiration from organisms

3. The change in elevation over a given distance

4. A stream or river that is composed of multiple channels that divide and rejoin around sediment bars

5. A fan-shaped mass of rock material deposited by a stream when the slope of the land decreases sharply

6. Any form of water that falls to earth's surface from the clouds

9. The area of land that is drained by a river system

11. The materials other than the water that are carried by a stream
