

Name: _____

Date: _____

The Waves

Across

- 5. vertical distance from the top of the crest to the bottom of the trough
- 7. time required for two successive crests to pass a point
- 8. Highest point above sea level
- 10. Faster, longer period of waves appear as a regular pattern of crests and troughs moving across the sea surface

Down

- 1. Movement back and forth at a regular speed
- 2. Lowest point below sea level
- 3. Half of a wave
- 4. Distance between two crests or troughs
- 6. Wind drags across the surface of the water, stretching the surface resulting in wrinkles
- 9. Distance over water that wind blows in the same direction
