## Think Take Crossword

Across
3. Expressions that have the same value.
8. A value that does not change
13. A mathematical sentence that contains less than, greater than, less than or equal to, greater than or equal to, or not equal
14. a property indicating a special way in which multiplication is applied to addition of two or more numbers in which each term inside a set of parentheses can be multiplied by a factor outside the parentheses, such as $\mathbf{a}[\mathrm{b}+\boldsymbol{c}]=\mathbf{a b}+\mathbf{a c}$
15. A symbol used to represent any unknown number in an algebraic expression or equation.

Down

1. A number, a variable, or the product of a number and a variable
2. The property that says that two or more numbers can be added or multiplied in any ORDER without changing the result. commutative property
3. A number multiplied by a variable in an algebraic expression.
4. The property that states that 0 plus a number is still that number OR the product of 1 and number is still that number. $\mathbf{a}+0=a$ or a*1=a identity property
5. A mathematical phrase involving at least one variable and sometimes numbers and operation symbols.
6. Changing the grouping of numbers will NOT change the value. For example: $[7+4]+$ 8 = 7 + [4 + 8] also works with multiplication and addition
7. When a number is sulstituted for a variable in a mathematical expression or equation
8. Numbers, variables and operation symbols that are connected with an equal sign
9. A mathematical statement with at least one variable and sometimes numbers and operation symbols.
10. to write an expression in a simpler form
