# Thinking and Problem Solving

## Across

- 3. The ability to control your own thoughts
- 7. The way you present something
- 8. To overestimate the accuracy of one's beliefs
- 9. tendency of approaching a problem a certain way , often a way that has been successful in the past
- 10. your belief that past events affect the probability of something happening in the future.

## Down

- 1. the tendency for one's preexisting beliefs to distort logical reasoning
- 2. the little picture we get in our brain when we think about a word someone says
- 4. Set of instructions for solving a problem or completing a process
- 5. a mental grouping of things , events and people that is used to remember their aspects
- 6. a mental shortcut that allows people to quickly make judgments and solve problems
