# Tiler's tools

## Across

2. Cuts effortlessly through hard materials- such as ceramic or porcelain tile, concrete, and bricks  
 7. Marks lines out to make sure that the first line of tiles is straight  
 9. Cuts through materials  
 10. Dense, absorbent sponges that remove excess grout from the surface of the tiles with ease  
 12. Makes sure that your work is at level !

13. Nibbles the tiles to create shaped edges that the tile cutter can't handle

14. invaluable plastic crosses that ensure the space between each tile is uniform & stop the tile from slipping

## Down

1. Can be used for many things but also sponging clean the grout from the tiles  
 3. Evenly spread of mortar on the wall or tile

4. A flat trowel used to spread the grout into the gaps between the tiles

5. Gently nudges the tile into place and ensure it bonds properly

6. Another tool to evenly spread of mortar on the wall or tile

8. Long-stemmed implements with a motor that whisks mortar

11. Drives objects (like nails)
