# Titanic Glossary

## Across

2. The left side of the ship when facing the bow.

4. a unit of speed on the water equivalent to approximately 1.150 overland miles per hour

6. The rear part of a ship.

10. A small iceberg. The worst kind of berg because it is a larger berg that has melted and is lower in the water and more difficult to see.

12. Near, forward, or in the stern of a ship

13. A furnace in which coal was burned to boil water and create the steam that powered the Titanic's engines.

14. Caused most of the deaths on the Titanic. When a human's body temperature goes below 95 degrees. This phenomenon took no more than 15 minutes on those of the Titanic.

15. At, near, or toward the bow of a ship.

## Down

1. A lookout platform mounted high on a ship's mast

3. The right side of a ship when facing the bow

5. The forward or front of a ship.

7. Royal Mail Ship

8. An upright partition or wall dividing a ship into compartments that help to add structural rigidity and prevent the spread of leaks, water, or fire.

9. shoveled coal to feed the ship's boilers.

11. a raised platform or structure where the wheelhouse is mounted: the ship is navigated from here.
