

# Toxicology

**Across**

- 1. likelihood that the toxicity will be expressed
- 4. contact providing opportunity to obtain poison
- 8. one month repeated doses
- 9. type of toxic effect
- 11. develops a way of understanding chemical effects

- 12. 1-3 month repeated dose
- 14. how often it occurs
- 15. the amount of time-chemical in body can build
- 16. adverse effects a chemical produces

**Down**

- 2. deleterious response in bio system

- 3. amount of substance that will kill
- 5. evaluating risks that are happening
- 6. man-made substances
- 7. study effects of poisons
- 10. mg of chemical/kg of body weight=mg/kg
- 13. >3 months repeated doses
